PsuFan You can also use the script installer to install newest version of Core Patch 1, To Renegade & FDS.

All You have to do is download the Script Installer once, Then you can click install to renegade & click cp1. It will always download the newest version (maybe few days lag on newest version), But anyways it will download the newest version, & you will never have to download the Script Installer Again. The script installer will download the newest version of CP1 without having to download the script installer again!

<http://www.psumaps.co.nr/p/scriptinstaller.htm>

The Script Installer Has Been Updated To v3.2.3 (5/28/07)

Unlike the other installer, This will install the newest version without downloading another installer!
