Stop connecting your unauthorized server side clients immediately. You are mass connecting to our servers with hunderts of game clients, and your protocol is all fucked up. All you produce is extra maintenance on our part, and instability and performance loss on the RenGuard network. You may be very well responsible for the past "mass disconnect" issues.

You're not authroized to connect to the RenGuard servers, I haven't seen anyone from BHS authorizing to do so.

I am not amused at all.
