I got a intel core duo 1,86 with geforce 7600 and can still only run it on medium without lag. It is a laptop, though.

Playing on high is possible but everything slows down then.

Same processor, but i think the X1550 is lousier. I can run at 1440x900 at around 17 fps.

I run mine with AMD 3400 ~1.8 GHZ
512 memory.

Works fine with me, i get no lag.
