IWarriors wrote on Tue, 05 June 2007 07:04 Does anyone know if I can disable this animations on this object server side please?

Also, what is the script that stops giving the enemy points if added to an object?

Thank you.

What do you mean? The water around the vehicle or it's propellers?

Also, you can just change the "settings" of a vehicle in level edit so that the damage points = 0 to not give points away for damage (and killed).
