I had tried to keep up with the emails of this or these files, but could not. my email is only 10 meg in size, and for one reason or another, every time I tried to upload a batch of them out, it would come back to me saying email too large for box or something close to that.

So here's the latest.

The file has been uploaded to it's new home, and I am now awaiting for their reply telling me it's new Download url. then, ASAP I will get back to you guys and let you know where you can download the files for your testing of two of the BF42 buildings. Its now back to being one .zip file with two mini .mix maps in it. Size is about 15meg in size. If this is a problem, let me know and I can break them up and re-submit them in two separate files.

But as we speak, I don't know what the download URL is but will soon, since it's late Friday night, it may be tomorrow or even Monday, before they get back to me. but in any case, I will post here and emails to you guys letting you know where you can get the files. And again, thank you for your help in this Beta testing, you're names will be added to the readme file when the final maps come out.
