---

so i got vista and everything is working fine with the running as administrator stuff so ren is great, but my ts is a little off. I can do everything fine when im not ingame, or in IE or another program, but as soon as i go back ingame or in a program then my push to talk does not work. I can use the voice activation ingame and the push to talk when i alt tab out.. any ideas? and dont say just use voice activation i want to fix this.

thanks
