Heya guys when i start rengaurd up it starts up then quickly shuts down and leave a message saying "Failed to recieve list of available master servers. Check your internet connection. If this is a firewall problem what ports do i need to open up. BTW i have just got this message and have being using rengaurd for ages without anyprobs on my system. I use ICS and my computer runs through the half backed router. I have attached error message

Real-Time RenGuard Statistics:

2446 players have logged into RenGuard in the last 24 hours. There are currently 585 players logged in and are currently playing on RenGuard-protected servers. 72 servers are currently online and protected.

04 June, 2007 -

RenGuard 1.0323

Failed to receive list of available master servers. Check your internet connection.

OK

Server owners running RenGuard 1.0323 will lose connection to the random "mass" servers. Please note that partial updates are not supported.

21 May, 2007 - RenGuard 1.0323 Released!

Your RenGuard client should now auto-update to version 1.0323. This version includes the following fixes:
1) Some people had trouble with RenGuard crashing while running while XFire was also running. This has been fixed.
2) A client/master communication has been changed which we believe will reduce (but hopefully stop completely) the "been seeing" error.
3) Latest version of *cough* is now detected and stopped by RenGuard.
4) Memory scanning fix for certain versions of game2.exe that it did not previously scan correctly.

- Crimson

24 April, 2007 - RenGuard version 1.032 released!

RenGuard version 1.032 has passed all beta testing and is now available as a MANDATORY forced upgrade. If you are using version 1.03 or one of our beta test clients, you will automatically be upgraded to version 1.032.
