I get this error TOO OFTEN, i mean i was so mad at RG i was cussing out it out on TS because it did this to me 5 times in 1 match, people heard me of course, and they were like, dude, whats wrong with you? I said...RG...is...the spawn...of satan...Yeah after that LAWLs. But i tell you all now it has NOTHING to do with clicking RG or Renegade fast, and i will state again that SOMETHING is not coded right.
