2. Everyone should run AdAware periodically. Even if you don't visit gay porn sites you can get spyware.

Don't want to tick you off and whatnot but is this only for gay porn sites? Are all the teen and M/F ones free of spyware? Can you just double check for me?

I had just assumed that was the sites that he visited. He said that these forums were "gay", and most people who use gay as an insult are also homophobes or gay-haters, and there is a large percentage of gay-haters that are actually closet gays themselves (they hate the fact that they are gay, and they act like they hate all gays so that nobody will suspect).

As a general rule I would say that "most" porn sites probably have spyware, but I'm just guessing and have not conducted a survey or anything
