I did it! I also added a chem sprayer weapon to it (seems appropriate, sprays out the front)

I also turned the Apache into a Comanche. (stealthed -- real thing is stealthy --- but dual weapons won't work, only the first one fires.)

P.S. Anyone notice many helicopters have names of Native American groups? (i.e. Apache, Comanche, Chinook...)

P.P.S. How do you add attachments? There's no button...
