New version.

- changed it so when raveslaw dies, it will end the game
- changed raveslaw's health so it is more realistic
- repair gun is now a sniper repair gun so you can help your buddies easier

- fixed the tank spawners
- removed flame tanks from tiber pit and replaced them with tibertanks
- added a "noticeable" bot, one in the first zone, two in the second...etc

- Changed the single shot ramjet to a better version.
- Other minor changes

I would like to play online with you guys, looking for three people.
