The plane (if there was one) would simply skid on the ground and then just totally miss it, the pentagon aint tall at all, the odds of the pentagon. And there wasn't a single mark on the lawn next to it.

Also, 9/11 the WTC attacks, there were missiles on the bottom of the plane..

EDIT:

Everyone should look at <http://www.youtube.com/watch?v=7E3oIbO0AWE> "Loose Change" it is very well informed and it looks on every aspect of the attacks.
