Subject: Renegade crashes upon exit
Posted by Ac1dBuRn on Wed, 27 Jun 2007 22:39:38 GMT

Hi,
ive looked through the forums and couldnt seem to find a similar topic, so ive decided to open up a new one.

i havent played renegade for awhile, so ive updated renguard and installed the newest scripts.dll yesterday.
now the problem is, everytime i normally exit renegade i get a windows error message saying something about a critial error has occured.

i'm curious if any of you have experienced the same thing lately and maybe have a solution at hand.

thx in advance!
