also, when this happens renguard remains open, its really just the renegade client that crashes.

could this issue be related with the dx9 stuff from scripts.dll?
because i didnt seem to have this problem pre dx9.

(btw im running on xp sp2 with up to date directx (june i think) and current nvidia drivers as well)

so long!
Best way to find out is to go back to scripts 2.9.2 who don't use dx9 yet.
