The old ladder was nasty, because if you joined your favourite server, on a game with about 15 minutes left, and the team you were on had no Air/Wf or Bar/HON then you'd make very few points (you wouldn't want to leave - it's your favourite server!) and then you'd be fined like 80 ladder points for having a low score, when you couldn't actually make a high score, because you had no vechs or inf.

Edit - typo fixed

i joined ren shortly before the ladder system went down last year, so for my futura83 account it still says im ranked in the 9000s...
