Goztow wrote on Fri, 06 July 2007 04:57 If it doesn't give you an error message, then it seems to me that it is not Renguard exiting your game but rather Renegade crashing. Did you change your scripts-version recently?

Well that's partly true, i just downloaded new skins, like blue sbh, stanks, paintball bulletholes, golden beacons, etc. I think they changed my my scripts. But if i'm not mistaken renguard been weird before i installed those skins 3 days ago, but it gone worse after i installed the skins and i didn't notice it, since it was doing auto-quit game before i got those skins, but yeah now it's worse. I'll delete those skins...coolie skins =/. But again i think skin only affect the problem max 70%, the other 30% i'm not sure.....
