No, I checked my logs, checked SS's of his hostname, even his sig says "a0000000u" 7 zero's same as ours....we logged in with paging it EVERYDAY when we played i remember typing my pass all the time too......plus, it's not a000000t, thats his other server hostname, he has 2.

Ok, I have the pass reset, but it doesnt say where to type the new password, theres no box or anything....
