A few?

There was alot more servers then there is now, dont forget that ASIA, USA, Euro were seperate.

You could just scroll trough the USA one, and trough the EURO one..

The only server that had like 3-5 game server was the pacific one.

Anyways, im against it because you would have less to pick. Say I don't like the modified stuff.. If all the big servers would put that trough there would be no place to play. At least there is some choice now.
