Your missing a file, the fds has nothing to do with brenbot, brenbot loads in a IRC program, is it just sits there, then make sure there is a error window also open, I've never had this problem as it usually then says

FDS loading
Checking for bandwith....

.....

.....

1mbps upstream bandwidth found
COnnecting to USA server..
Logged in OK!

Loading map CNC_field.mix

and game starts...
