---

Hey guys,

I was wondering if anyone had any suggestions. I have been playing renegade for many years.. during the summer. I normally install renguard at beginning of summer(s). I lost my disk and bought the first decade.

However, when I installed renguard, it started running its pre-checks and said that bandtest.dll is a corrupt file and promptly closed. I tried deleting it but it is needed to run my renegade. Any ideas?
