hey buddy your not the only one, I used to get that message also ever since I bought this "new" computer 2 yrs ago.

now however almost everytime I try to exit Renegade, I click YES and the hand freezes and a new standard arrow curser pops up. I can't get out of that screen no matter what I try so I just have to turn the computer off.

after 2 years I stumbled on the idea of leaving the game I'm in, then hitting control-alt-delete or the Windows key on my computer and ending Renagde that way.
