guys u don't understand
my server works fine but i could not join other server but people could

now the port thing is working and i know what was wrong
the wrong thing was that all the time when i turn on my comp the svchost.exe thing is taking like 150mb of memo usage so i was turning it off and that is y is did not work so do u guys know how can i fix that problem so the svchost will not go very high
