As Carrier said, the latest Custom Scripts sort WOL server list by players. With Resurrection you can define what the default sort order is.

#2

Goztow: Afaik you cannot fake the player amount for WOL server side, because the number of players being in the server's WOL channel is used. But that causes another problem: GameSpy users are not included in the WOL player amount.

#3

I agree that there are too many servers, but I disagree with solving the problem using a0* nicknames. Using the player amount for sorting is quite nice for a game with many servers and less players.

To #2 : Blazer said he'd have it as a feature in his Linux xwis fds...
