joel-nl wrote on Fri, 13 July 2007 13:01 the weird thing is  
when i try  
gamespy in server.ini no problem  
normal queries in ase and server is accesable

when i try wol in server.ini no problem  
server is accesable on wol

but when i try  
wol + gamespy via brenbot 1.50  
no queries in ase and server is accesable on wol but not on ase

Use Renegade Ressurrection <http://www.icefinch.net/en>  
And you will see your Server on WOL,GSA and ASE ^^
