Blazer wrote on Sat, 14 July 2007 02:18I use Vista and I have not had a *single* problem with anything. Even RenGuard 1.03 with SVKP worked fine the first time.

Ah, but if you run FRAPS on games like BF2142 in XP, then in Vista, are they the same speed or faster? That's why I didn't stay upgraded.

Quote:The only thing I highly recommend is turning off UAC as all the prompts to "protect" you, get annoying real fast.

Oh yes, I think the entire world is unanimous in saying that. Any Vista computer I've used for any length of time I've turned it off, whether or not it's mine.
