Ok, I'm bringing this thread's moved topic back to my original post..

If you remember, in my original post, I said I got the Silos working... well opps, I made a mistake that made it look like they were working, and when I went to correct it, the second silo doesn't even appear any more.

I am having the exact same problem that I was having with the missing interiors of the Ob and AGT. Since I fixed those 2 thanks to YSLMuffins, I attempted to fix the silos the same way... except, to my surprise, I cannot fix it the same way because there are no presets for Multiplayer silo aggregates.

..so I am in a bit of a problem here.. how can I make 2 unique silos appear on the map at the same time?!
