Subject: Re: Release: Hybrid Tanks
Posted by nodelites on Sun, 22 Jul 2007 22:13:32 GMT

I have a thing for miniture things, so these are small. they share the base of the first tank. (cuz it can suport many turret shapes)

(All of the tanks in this thred were done while i was learning gmax/renx, so thats why they so simliar, i just wanted to get opinions so i could improve them better[base, size, positions, etc)]
