Subject: Renguard and new maps...
Posted by Starbuzz on Mon, 23 Jul 2007 08:50:52 GMT

Hullo...

I play a lot in the Jelly New mappack server. However, even with the new maps that came with CP2, there are still some maps I need to download to play in that server.

They routinely use this map CnC_Cairo. I know where to download it (from their site) but my BIG question is:

Will RenGuard kick me if it finds the map in my Renegade directory? It is only 1 map.

Please help! Much thanks.
