I thought this was really neat... I just got a call from one of our local Navy recruiters today, and he offered me a job. The job: Programming for Top Secret Advanced Missile Systems. So, my first thought was "eh?". Apparently I'm in the top 1% of students in my area for this, and was highly recommended by the Tech Department in my school district.

So, I thought I'd share the news because I think its really neat. And I'm pretty serious about it, so I invited the recruiter over tomorrow at 4:30 to talk about it!
