---

So here's the deal...I decided to do something different for a change and edit some of the radio commands. So I edited the strings table and put the strings file in my renegade data folder. For me everything works fine, I can hear them and see the changed ones and all, but apparently the rest of my team can't. Anyone know how to fix this because I've seen other people use these edit radio commands and I could hear them using it? Thanks!!!
