@ Sn1per74: Ctrl+G while you're viewing the AppSettings.htm and goto line 441.

As for me though, I think I botched up something when following that tutorial on MSDN's website...

It all goes fine until the end when I try to compile the source to SSSCoOp, but at the end...it goes like the following >>

```
Compiling SSSCoOp Sourcedllmain.obj : error LNK2019: unresolved external symbol "int __cdecl
__CxxSetUnhandledExceptionHandler(void)" (?__CxxSetUnhandledExceptionHandler@@YAHXZ)
referenced in function _NotifyHookUnhandledExceptionHandler
scripts.dll : fatal error LNK1120: 1 unresolved externals
```
