Anyway it's a mod based on the renegade dead 6 team, they've had kirby990(or whatever numbers) to write up a story and they've done a lot of concept work in the past when it was going to be for half life 2.

Ahem! It's Kirby098 mister.

And I am still very much around and contributing best I can.

I have finished my piece and our single player plot has a thumbs up from the powers that be.

That alone should tell you somethin'.
I can't talk about the details too much, but Dante may expound a bit.

Dante, what can we reveal?
