Ok, Here.

Go Into svrcfg_cnc.ini where you set which map is First Etc.

it should have these:

```
[Settings]
ConfigName=Default C&C Server Settings

bGameTitle = [RR] RenRavers Server (is a Eg.)

bMotd= Welcome To RenRavers AOW Server!

ModName=

DoMapsLoop=yes

TimeLimitMinutes=30
```

Where it says ModName= Put: The Name Of The Package Followed by .pkg

```
Example:
[Settings]
ConfigName=Default C&C Server Settings

bGameTitle = [RR] RenRavers Server (is a Eg.)

bMotd= Welcome To RenRavers AOW Server!

ModName= MyMod.pkg

DoMapsLoop=yes

TimeLimitMinutes=30
```

Then.

Scroll Down The Config File...

Find:

```
MapName=Map1.mix
```

```
MapName00=Map1.mix
```

MapName01=Map2.mix

Then Set The Maps As This:

MapName=Roleplay2_Test.lsd

MapName00=Roleplay2_Test.lsd

Open Up Your Server Then Join. It Will work. As long as you have the mod package in your clients Data folder.
