^^ ignore the moron above me.

I am actually typing on my HP right now and it owns. Why are we comparing macfaggotry with dellfaggotry, start thinking about what is good for you. If you don't do anything requiring an idiot proof mac, get a HP, Toshiba, Gateway, or Sony. Buying a mac is stupid for most people because it isn't budget friendly and 90% of people will never use the full potential of a mac. Bottom line, don't become a trendfag buy what is good for you.
