I got the DDS Converter 2, and it didn't work.

I did selected the DTX5, now what...

Here are my steps:

Extract .dds Skins of Always.dat > Launch Paint Shop Pro 9 > Open .dds > Show Mip Maps "No"
> Edit > Save As .png > Launch Converter 2 > Open "Edit".png > Option and select DTX5 >
Convert

And I test it and still not appeared.

what did I do wrong, and wich options I must select of the Converter?
