Quote: Merriam-Webster's Medical Dictionary -

Main Entry: life

Pronunciation: 'lɪf

Function: noun

Inflected Form: plural lives /'lɪvz/

1 a : the quality that distinguishes a vital and functional plant or animal from a dead body b : a state of living characterized by capacity for metabolism, growth, reaction to stimuli, and reproduction

2 a : the sequence of physical and mental experiences that make up the existence of an individual

b : a specific part or aspect of the process of living <sex life> <adult life> —life-less /'lɪf-lɪs/ adjective
