The ground and other textures don't appear. Clicking walk-thru mode will only cause me to fall through the map.

I didn't have this problem on my other PC.

I had the same problem, I couldn't work out what was wrong for a ages.

You need to have a copy of Renegade installed with that map installed.

Then it work.

The LE reads the Renegade Data folder, so if you don't have the map installed, this happens.

Hmmm thanks. Never knew I had to have the map installed in my data folder. Works now.

You're welcome.
