I seem to be missing some presets that i need to use.  
This is in level edit i dont know where this problem came from cos on my other computer level edit is working fine with all presets there.  
Tho on this computer i seem to miss quite a few that makes my modding not possible.  
I am using windows vista (for some people that might ask)  
And so was my other computer on which it worked great.  
And i am running the program in administrator status and in windows Xp.

Thanks in advance
