nowud13 wrote on Fri, 24 August 2007 09:23l seem te be missing some presets that i need to use.

This is in level edit i dont know where this problem came from cos on my other computer level edit is working fine with all presets there.

Tho on this computer i seem to miss quite a few that makes my modding not possible.

I am using windows vista (for some people that might ask)

And so was my other computer on which it worked great.

And i am running the program in administrator status and in windows Xp.

Thanks in advance

I already linked you to this fix, read the post people take the time to post for you. This is also your second topic in one day about the same subject.
