Now THATS a usefull reply. Thank you.

Youd be surprized at how many forums would reply the same as you, but make it impossible to understand.

Whitedragon

The easiest way to make custom commands would be with the LUA SSGM plugin. It allows commands to be scripted in a simple scripting language called LUA.

You can download it here.

SSGM can be downloaded here if you don't already have it.

If you need help with the LUA plugin then post on their support forums.

.....
This reply was VERY usefull.
