If you know anything about code, C# is completely different from VB.NET.

Get as hyped up as you want, but I'm not Mandai. I've been a member of this community for quite some time. I also have accounts with cnc Reborn, a Path Beyond, and n00bless.com

Make as many random accusations as you want.

If you want any evidence, feel free to ask. I'm completely open. I have nothing to hide.

In fact, knock yourself out. Here's the source for launching Renegade and the other programs.

Try

```
    For Each lviApp As ListViewItem In gobjProgList.lstProgs.Items
        Start(lviApp.SubItems(1).Text)
    Next
Catch ex As Exception
    MessageBox.Show("An error occurred while loading the other programs. Please try
again.", _
    "Error", MessageBoxButtons.OK, MessageBoxIcon.Error)
Exit Sub
End Try
Try
    Dim strLaunchCommand As String
    strLaunchCommand = txtRenPath.Text
    strLaunchCommand += " +connect "
    strLaunchCommand += txtIP.Text
    strLaunchCommand += ":" & mstPort.Text
    strLaunchCommand += " +netplayername"
    strLaunchCommand += " " & ControlChars.Quote & txtNick.Text _
    & ControlChars.Quote
    strLaunchCommand += " " & txtCommands.Text
    Start(strLaunchCommand)
Catch ex As Exception
    MessageBox.Show("An error occurred while launching Renegade. " _
    & "Please make sure that the Renegade executable path is correct", _
    "Error launching Renegade", MessageBoxButtons.OK, MessageBoxIcon.Error)
End Try
End Sub
```

You're either very brazen to accuse someone of such things with little to no basis or you're just that much of an idiot. I'm half-tempted to believe the latter.

Edit: Nice work on that program. It's always nice to see people putting effort into the game, even if you catch a lot of slag from random people.

Thank you. Again, if you want me to bring forth any evidence, feel free to ask.
