19:17] Secure link established.
[19:17] Welcome to RenGuard, SirMark9!
[19:17] To launch Renegade, please click 'Renegade'.
[19:18] Unauthorized Renegade instance terminated.
[19:33] Unauthorized Renegade instance terminated.

I have exactly the same problem,but this is what happend.

Sometimes when I first start the game,that message shows up,and I'm not even online yet!

Also,when I finnally got online,I went to this one server,no problem,and when I join my favorite server that I got scripts for,the message shows up again.

Also,I unistalled Renguard from the control panel,but it still shows up. Besides this (And the Unauthorized Renegade instance terminated thing) (major,minor) problem,Renguard is still a good tool (Mostly for the fast loading times and the sounds)

Anyway to fix this? (I may have to reinstall Renegade,get my scripts again,and then finnaly redownload Renguard)
