I use that skin. I get 10 FPS average as it is even with all the detail set to low on my mother's garbage PC. TuNa would know, he's seen my screenshots LOL. Before I got that file, I use to run into tiberium side tunnel of Volcano and dropped down to 4 FPS in the middle of a pistol fight. Now I don't anymore. I say RenGuard should legalize it. It helps for me not in an advantage way, but FPS way.

Also, if ReaL got it from the same site I found it on, I also downloaded something that doesn't reduce FPS when using Chem Sprayer, Flame Thrower and Flame Tank.
