So i joined a new clan, And I was bored, So I decided to join UNRules Fan-Maps server (The map Desert siege was the current map) and I love that map, To my surprise, I was Nod (Extra pwnage.), So I bought a SBH and a Nuke.. Then GDI tried to APC rush, But failed, A Havoc got vaporized by the Oblisk, So I picked up his Ramjet.

I then buy a Recon and drive behind GDI's base and wall-walk down behind the Barracks, And waited for a little while, No one was about so I plant my nuke.

10 seconds left, And a engineer comes around the corner, I said "ha.. He has no chance." so anyway, This engineer looks at the nuke, turns around and kills me with his repair gun. -_-

Then disarms the Nuke in 0.01 seconds.

I then say in all chat "bla bla is cheating.. He killed me with a repair gun and disarmed my nuke in 0.01 seconds".. My message fell apun illiterate eyes.. So I repeat it hoping someone in IRC will see my message, But to my surprise, 5 players called me a n00b and said, "It's a glitch." I rofl'd so damn hard my floor broke. D:

Conclusion: dumb-ass players, Cheaters heaven, Badly moderated. :'(
