what kind of bird can't fly
they're kind of a disgrace tbh

i got something sensational for ya

$1/3 = .3$ repeating

$1/3 \times 3 = 1$

since $1/3 = .3$ repeating then $.3$ repeating $\times 3 = 1$ right? no, cuz $.3$ repeating $\times 3 = .9$ repeating D:

$.9$ repeating has to equal one then right? cuz it equals $1/3 \times 3$, but doesn't $1/3 \times 3 = 1$?
