Anyone does read readme19.txt ?!

=====
Jayrun's HUD fixes
=====

Fixes:

- HUD hook will now correct work with vehicles.

- Fixed Quad XPos, Quad YPos swap

Known troubles:

- With negative values of Quad YPos you values must be increased of 256 (ex.-128 must be -384)

 - Set HealthBarStyle=1 to enable a bar similar to the renegade shield strength bar
 - Set ShieldBarStyle=1 to enable a bar similar to the renegade shield strength bar
 - If HealthBarStyle (ShieldBarStyle) not presented in hud.ini bar style will be similar to the renegade health bar
-
