C C_Ren-APB wrote on Wed, 12 September 2007 18:29 Yeah Thats about the reply expected from *cough* people like yourself.

Always hurts to be told the truth ey? well take your head out of your ass and really learn to code properly.

Very simple It's Buggy code, as were your last br codes so instead of replying like some imature child, try going the next level and re-examine it, and perhaps you may see it yet, in other words leave it in beta or maybe even alpha till the average "joe" can pretty much download it and then simply configure it and start it. then release it.

Just cuz you dont hear about it on this forum DONT make it not buggy?.

And simple #1 problem is already posted above your post so ,What were you trying to say mr *coughs* full of yourself?

I'd like to see you make a good perfectly buggless ground-breaking bot, as you apparently expect.
