Yrr wrote on Thu, 13 September 2007 23:47: What crashes?

My website is www.icefinch.net, but I'll add information there about that project later.

Level Editor.

I'll first unpacked it and all that, that work's fine.

Moved the .lvl folder to my main modding folder, placed it with the other Levels.

Started Level Editor, make sure that the presents are right, then started to load the map, then it crashed.
