WikipediaThe package will be available at retail stores and through Steam (Valve's content delivery system) for direct download. A retail copy of Episode Two will reportedly not be available separately from the packages.[4] Originally a 'Black Box' retail package was to be released, containing only Episode Two, Portal and Team Fortress 2, but this was canceled by Valve in May 2007 due to retailer issues.

Sadly it doesn't seem like they will be doing that and the price of buying any 2 of the 3 is over 44 bucks
