HORQWER were not making fun of you because your 12, we know you are smart, and you've always claimed you were, well show it then, something non renegade related doesnt need to be brought up here, if you need 3dsmax help, google, this isnt 3dsmax support forums. And saying "oh i get it" in a mod forum doesnt belong there, thats another reason why others make fun of you, you dont read, you dont pay attention, and you just want things done your way, they wont be done, your mod will never finish or work unless you do something and make it work, asking us questions in wrong places or useless statements wont get your mod done.
